

Letter of intent

Moiré Association for Culture (Moiré Kulturális Egyesület) is glad to be taking part in the project initiated by Festival Blaues Rauschen as one of the partners and participants. Our role as the partner of the project will consist mainly in organizing one or more workshops and artistic event in Pécs, connecting them to the local sound and media art scene (young artists, students of the university at media courses, activists of our radio station etc). As participant, we will work together with other partners to share programs in other cities too. We focus on connecting DiY scene (low-power electronic devices, self-powered music instruments and performances built around them etc.) into the scope of the festival, aiming at creating an open experimental workspace situation for participants and the public audience.

For our association, the cooperation is useful because of the possibility to connect the hungarian experimental music and sound art scene to the other countries' strongly-established cultural web, and it's a possibility for our artists to step through on our limits by contacting with the surroundings.

Moiré is established 2003 for representing and developing the hungarian experimental and computer music scene. We started Dióbél Recordings (2002), Periszkóp Rádió (2006) and the Hangfarm open-air sound installation exhibition place (2013), organized several events in Pécs, Budapest and Székesfehérvár, some of them with collaboration with universities and cultural associations from Germany (Open Systems of Essen, New Talents Biennale of Cologne, Privatelektro's Headphone Festival of Berlin), Czech Republic (Forum4AM) and France (Aix-en-Provence School of Arts) etc. We have strong connection with the Electronic Music and Media Arts BA and Sound Art MA programme at the University of Pécs, so our project could be extended with their creative potential too.

We hereby confirm our official partner role in the project and looking forward to realize it.

With best regards,
Pécs, 05.06.2024.
